this is a book simplifying market in a world of standardized products differentiation is on the basis of your service this book targets to rethink customer service from a

customer perspective

creative marketing lifts marketing theory and practice to a higher order a third level above operational and strategic marketing it provides a new mapping structure rationale market research methodology and a new unifying philosophical basis it involves a new and highly proactive approach to superior market value creation a secondary objective of the text is to draw marketing back into the province of general management acknowledging that it has for too long been divorced from its roots and thereby become dominated by an academic perspective the author argues that the discipline is currently unable to provide any definitive set of strategies that offer some prospect of guaranteed success under all possible market conditions this is because traditional marketing has been predicated on the basis that incremental improvements in a company's marketing mix is the only way to build and defend some sort of competitive market advantage in practice this advantage is often easily and quickly eroded by the actions of competitors contrary to this common organizational development wisdom long term empirical evidence clearly demonstrates that it is the companies that dominate their particular industry that in fact own the industry standard that enjoy the highest profit margins and enjoy the longest periods of largely uncontested market supremacy creative marketing as described in this book offers a means whereby any company can given sufficient creative imagination come to dominate its industry irrespective of its present market status this is because the processes involved are not contingent upon some sort of technological superiority or extensive financial or other resources the text provides the methodology for realizing the long sought envelope curve path of corporate growth and profitability that means never having to complete an industry life cycle perhaps the holy grail of marketing

marketing reversed prior business logic 50 years ago and said the customer is king and the companies began to recognize that it was not just the product that was the most important aspect of their business companies recognized that consumers had a myriad of choices of product offerings and marketing was responsible to ensure that the company's products had the benefits and attributes that customers wanted and were willing to pay for today considering the technology development which influences every function of the company the focus of the successful marketing oriented companies has changed from the customer is king to the customer is a dictator however and despite the new trends in marketing like any social science marketing has basic principles and these principles need to be considered when making any type of marketing decisions so the major step of a student of marketing whether it is a young university student or an experienced business executive is to understand the principles of marketing and reading the present book will be the first step in accomplishing this task this book describes these basic principles of marketing

and while the authors recognize that each decision may be slightly different from any previous decision the rules or principles remain the same the present book presents these basic marketing principles and tries to capture the essence of practical and modern marketing today therefore the purpose of principles of marketing is to introduce readers to the fascinating world of marketing today in an easy enjoyable and practical way offering an attractive text from which to learn about and teach marketing

covers traditional marketing techniques and theories alongside the latest concepts and acknowledges the increased importance of marketing in the customer oriented environment
